Electron beam testing, electron probe, chip verifications, failure analysis, computer aided design and test, design for testability, electron beam tester, signal mapping and tracing, spike detection. Eckhard Wolfgang was born in Waidhofen/Ybbs, Austria, on November 29, 1941.

Electron beam testing - ScienceDirect

Electron Beam Engineering maintains a high standard of inspection and testing equipment for electron beam welding and laser welding requirements. Helium leak testing and helium bomb testing are two of the most frequently performed tests to verify that a welded component is hermetically sealed.

Nanofabrication process using electron beam lithography

The electron beam (E-beam) irradiation process uses high-energy electrons for a variety of applications. Electron beam irradiation processing is commonly used in the sterilization of medical devices, contamination control, as well as the modification of materials such as, heat shrink tubing and wire and cable insulation.
