Views counter to methodological adaptationism range from strong views that deny that adaptation is a good guiding concept to weaker views that privilege different explanations. For example, Gould and Lewontin's (1979) argument for considering constraint-based "Bauplan" explanations before or along side selective explanations is an example of methodological anti-adaptationism.

Ideally, climate change adaptation measures are combined with disaster risk reduction measures to enhance resilience on short, medium, and long time scales. The role of uncertainties and time horizons is addressed by developing climate change adaptation measures on community level and in close cooperation with local actors and stakeholders, focusing on strengthening resilience by addressing current and emerging vulnerability patterns.

### **Climate Change Adaptation - Oxford Research Encyclopedia**

Adaptations serving different functions may be mutually destructive. Compromise and makeshift occur widely, not perfection. Selection pressures pull in different directions, and the adaptation that results is some kind of compromise.
