Physics 190E: Energy & Society Fall 2007 Physics of Energy I - 4 Understanding the physics of energy means learning about two sorts of things. 2 - How does each particular form of energy work. 1 - What general principles unify the physics of energy - applying to energy in all its different forms. We'll start with the general principles.

Energy and Power and the physics of explosions Comet Shoemaker-Levy crashes into Jupiter1 At the end of the Cretaceous period, the golden age of dinosaurs, an asteroid or comet about 10 miles in diameter headed directly towards the Earth with a velocity of about 20 miles per second, over ten times faster than our speediest bullets.

Energy to study the change in energy of a system between its initial and final states. In particular we shall introduce the concept of potential energy to describe the effect of conservative internal forces acting on the constituent components of a system. 14.1 Conservation of Energy Recall from Chapter 13.1, the principle of conservation of energy.
