Epidemiology Section. Public Health Epidemiologists work to understand the causes and effects of disease in communities. By studying the factors and relationships that determine the presence, numbers, trends and distribution of diseases, we can more effectively reduce health risks in our communities and respond to outbreaks of disease.

NC DPH: Epidemiology

Our efforts to more rapidly and effectively respond to health threats currently reach over 60 countries. We train field epidemiologists around the world, giving them the necessary skills to collect, analyze and interpret data and contribute to evidence-based decisions.

The Indian Health Service (IHS), an agency within the Department of Health and Human Services, is responsible for providing federal health services to American Indians and Alaska Natives. The provision of health services to members of federally-recognized Tribes grew out of the special government-to-government relationship between the federal government and Indian Tribes.

Indian Health Service | Indian Health Service (IHS)

The Epidemiology Unit was established in 1959 with assistance from World Health Organization (WHO) to strengthen surveillance of communicable diseases. Initially, the unit functioned with a WHO consultant and a national counterpart, who, after further training in epidemiology, was appointed in 1961, as the Epidemiologist of the Department of Health Services.
