

euwordnet a multilingual database pdf

2. The multilingual design of the EuroWordNet database The major difference with WordNet1.5 is the multilingual design. All language specific wordnets will be stored in a central lexical database system. Equivalence relations between the synsets in different languages and WordNet1.5 will be made explicit in the so-called Inter-Lingual-Index (ILI).

EuroWordNet: a multilingual database for information retrieval

EuroWordNet thus becomes a multilingual lexicon and thesaurus that could be used in applications such as multilingual text retrieval and (rather basic) lexical transfer in machine translation.
