### **4 Attribution of Particular Types of Extreme Events**

Some extreme weather and climate events have increased in recent decades, and new and stronger evidence confirms that some of these increases are related to human activities.

### **Extreme Weather | National Climate Assessment**

The water cycle, also known as the hydrological cycle or the hydrologic cycle, describes the continuous movement of water on, above and below the surface of the Earth. The mass of water on Earth remains fairly constant over time but the partitioning of the water into the major reservoirs of ice, fresh water, saline water and atmospheric water is variable depending on a wide range of climatic ...

Hydrological drought severity metrics duration and deficit have different controls. Streamflow drought duration is caused by catchment storage and dry spell duration.

### **Hydrological drought severity explained by climate and**

The picture above is the HAARP ionosphere heating facility in Alaska. There are numerous ionosphere heating installations around the globe that are used to manipulate the jet stream into historically unprecedented patterns.

### **UPDATED: Engineered Drought Catastrophe Continues, Target**

Global surface temperatures have increased about  $0.74\text{ }^{\circ}\text{C}$  (plus or minus  $0.18\text{ }^{\circ}\text{C}$ ) since the late-19th century, and the linear trend for the past 50 years of  $0.13\text{ }^{\circ}\text{C}$  (plus or minus  $0.03\text{ }^{\circ}\text{C}$ ) per decade is nearly twice that for the past 100 years. The warming has not been globally uniform.

Dr. Andrew Brookes has over 34 years of professional experience, is recognized internationally for contributing to river restoration, and is nationally recognized as an expert in geomorphology.

### **Welcome to the 6th Conference on Natural Channel Systems**

The availability and quality of water in many regions of the world are more and more threatened by overuse,

misuse and pollution, and it is increasingly recognized that both are strongly influenced by forests. Moreover, climate change is altering forests' role in regulating water flows and ...

### **IS WATER CONSERVATION AND WATER DEMAND MANAGEMENT A REAL**

Cretaceous anoxic events may have been triggered by massive volcanic CO<sub>2</sub> degassing as large igneous provinces (LIPs) were emplaced on the seafloor. Here, we present a comprehensive modeling study to decipher the marine biogeochemical consequences of enhanced volcanic CO<sub>2</sub> emissions. A biogeochemical box model has been developed for transient model runs with time-dependent volcanic CO<sub>2</sub> forcing.
