Face-to-face communication has received most attention in the health care literature focusing on interaction between health personnel and patients, but interactive communication - here defined as communication that does not involve a face-to-face encounter - is often equally important for paramedics (Tjora 1997).

Interactive and face-to-face communication: a perspective

executives preferred face-to-face meetings when the decision-making process was fluid, requiring the kind of give-and-take typical of complex decisions and sales.
