Water Rendering and Simulation. The color of water is influenced by a very large number of factors, especially by sky color and light conditions, so it's radically different on a sunny day vs. an overcast day.; Realtime: Academic Work. Scalable Real-Time Animation of Rivers, 2011. Uses a pixel shader on overlapping tiles, with a 'flow' texture providing the speed, direction and size of the ...

Design and visuals. Monte Carlo methods are also efficient in solving coupled integral differential equations of radiation fields and energy transport, and thus these methods have been used in global illumination computations that produce photo-realistic images of virtual 3D models, with applications in video games, architecture, design, computer generated films, and cinematic special effects.

In 1986 I made a computer model of coordinated animal motion such as bird flocks and fish schools. It was based on three dimensional computational geometry of the sort normally used in computer animation or computer aided design.
