

flare stars in star pdf

A flare star is a variable star that can undergo unpredictable dramatic increases in brightness for a few minutes. It is believed that the flares on flare stars are analogous to solar flares in that they are due to the magnetic energy stored in the stars' atmospheres. The brightness increase is across the spectrum, from X rays to radio waves. The first known flare stars (V1396 Cygni and AT ...

Flare star - Wikipedia

To date, astronomers have observed numerous large flares originating from cool dwarfs. This is due to the fact that M-type and ultracool stars can exhibit high levels of magnetic activity.

Powerful flare detected on an M-dwarf star - phys.org

A solar flare is a sudden flash of increased brightness on the Sun, usually observed near its surface and in close proximity to a sunspot group. Powerful flares are often, but not always, accompanied by a coronal mass ejection. Even the most powerful flares are barely detectable in the total solar irradiance.. Solar flares occur in a power-law spectrum of magnitudes; an energy release of ...
