power is limited. In terms of the three-step timing described previously, limited commitment means that the principal now revises the agent's allowable spending set following the agent's verification decision and result. We show that under limited commitment, TEC is optimal whenever verification is optimal.

Commitment vs. Flexibility with Costly Verification

One can interpret our solution as describing the optimal commitment device. In addition to Gul and Pesendorfer's framework, models with time-inconsistent preferences, as in Strotz (1956), also generate a value for commitment.
