In computing, floating-point arithmetic (FP) is arithmetic using formulaic representation of real numbers as an approximation so as to support a trade-off between range and precision. For this reason, floating-point computation is often found in systems which include very small and very large real numbers, which require fast processing times.

A common way to view a PDF form is in a web browser, for example, when you click a link on a website. If the form does not contain interactive fields, you can use the Add Text tool to fill out the form. Some forms open with the Add Text toolbar displayed. But with others, you must first save the form, then open it directly in Acrobat.
