rising food prices may have driven the total back to one billion, where it last peaked in 2008. Why, in a world that produces more than enough food to feed everybody, do so many â€œ one in seven of us â€œ go hungry? The list of answers routinely given is bafflingly long, often crude and nearly always polarized. Too much international trade.

Growing a Better Future: Food justice in a resource

I am pleased to present the seventh book in the Food, Health, and the Environment series. This series

explores the global and local dimensions of food systems and examines issues of access, justice, and environmental and community well-being.

Cultivating Food Justice: Race, Class, and Sustainability

Documents how racial and social inequalities are built into our food system, and how communities are creating environmentally sustainable and socially just alternatives.

Project MUSE - Cultivating Food Justice

Urban agriculture has become one of the fastest growing types of agriculture in the United States. Establishing more localized food systems, with the aim of achieving social justice goals, has become an important strategy for developing sustainable urban food systems that try to alleviate food insecurity.

Food Justice and Sustainability: A New Revolution

Through community education, political action, anti-oppressive organizing and community-building, the Food Justice Project seeks to challenge and transform the globalized, industrial, corporate-driven food system and promote existing alternatives.
