Make Your Own Trace Fossil In this activity, students can model how trace fossils form, by creating a special dough and making impressions in it with various materials.

### **Make Your Own Trace Fossil formatted - Museum of Science**

Fossil track ways, footprints, casts (the imprint) of animal and plant remains and burrows, are examples of trace fossils. Fossils found in well-preserved sedimentary rocks that consist of simple organic compounds or proteins, are known as chemical fossils. Petroleum is an example of a chemical fossil and coal is a macrofossil of plant matter.

### **Worksheet: What are fossils?**

of life. Fossils are fundamental to the geologic time scale. The names of most of the eons and eras end in zoic, because these time intervals are often recognized on the basis of animal life. Rocks formed during the Proterozoic Eon may have fossils of relative simple organisms, such as bacteria, algae, and wormlike animals.

### **W T' U.S. Department of the Interior / U.S. Geological**

Educate the kids about fossils before they make their own. The first 3-4 minutes of the event should be captivating and peak everyone's interest. Show them real fossils is possible. We brought in real fish, trilobite, ammonites and plant fossils plus a petrified dino bone! Each child had a real trilobite fossil on their desk to touch.

### **Homemade Fossils “ MADE EASY! | Home Grown Fun**

fossils in a transitional series are unlikely to represent a sequence of direct ancestors and descendants; however, such series of fossils provide insights into how major new forms took shape. Our evolutionary history is a story of retaining some traits, retaining but heavily modifying some traits, and completely losing

others.
