Elementary Differential Equations with Boundary Value Problems is written for students in science, engineering, and business. It focuses the student's attention on the idea of seeking a solution of a differential equation by writing it as  $y' = f(x, y)$ , where  $y_1$  is a known solution of related equation and  $u$  is a function to be determined. I use

PARTIAL DIFFERENTIAL EQUATIONS SERGIU KLAINERMAN 1. Basic definitions and examples To start with partial differential equations, just like ordinary differential or integral equations, are functional equations. That means that the unknown, or unknowns, we are trying to determine are functions. In the case of partial differential equations
