The rigidity of their structure comes from the continuity requirements of the group inversion map. In this chapter we present the axioms that define a Lie group. [PDF] Chapter 3: Matrix Groups Almost all Lie groups encountered in the physical sciences are matrix groups.

multiplication. This has a Lie group structure from its embedding as an open subset of \mathbb{R}^{n^2} by matrix entries. $GL_n(\mathbb{C})$, with matrix multiplication. We can summarize Lie theory as the (shockingly successful) study of linearization, whereby one tries to study non-linear structure of a Lie group by the linear structure of its Lie algebra.
