pdf Abstract To facilitate policy decisions on mitigation and adaptation strategies, it is necessary to
understand, quantify, and synthesize these climate-change impacts, taking into account their uncertainties.

Multisectoral climate impact hotspots in a warming world

The IOM committee recognized that the new guidelines were limited by lack of data in a number of key areas.
Pre-eclampsia and gestational diabetes mellitus were recognized as important maternal health concerns
related to excess weight gain, but there was insufficient evidence to determine if high total pregnancy weight
gain was the cause or consequence of these conditions.

Towards Defining Optimal Gestational Weight Gain

Introduction. The pathology of tennis elbow (lateral epicondylitis) remains an enigma. Cyriax (1936) wrote
"A condition, the symptoms and signs of which are as constant as those of tennis elbow, may well be
supposed to have but one pathology and, as a corollary, but one type of treatment".

Litigants'™ epicondylitis - ScienceDirect

Results. In total, 2160 were included in this analysis, average age was 70.1 ± 3.0 years. Overall, 645
(29.9%) presented good quality of life as assessed by the general health dimension, and thereby qualified as
successful aging.

Factors associated with successful aging in persons aged
