

geostatistical glossary and multilingual pdf

This glossary of geography terms is a list of definitions of terms and concepts used in geography and related fields, which describe and identify natural phenomena, geographical locations, spatial dimension and natural resources. Geographical terms are classified according to their functions, such as description, explanation, analysing, evaluating and integrating.

Glossary of geography terms - Wikipedia

In spatial statistics the theoretical variogram ($\gamma(h)$) is a function describing the degree of spatial dependence of a spatial random field or stochastic process ($Z(x)$). In the case of a concrete example from the field of gold mining, a variogram will give a measure of how much two samples taken from the mining area will vary in gold percentage depending on the distance between those samples.

Variogram - Wikipedia
