In linguistics, grammar (from Greek: γράμμα) is the set of structural rules governing the composition of clauses, phrases, and words in any given natural language. The term refers also to the study of such rules, and this field includes phonology, morphology, and syntax, often complemented by phonetics, semantics, and pragmatics. Speakers of a language have a set of internalized ...

Hi Bob, The use of "ing forms was touched on in a previous question (see 'ing forms and post modification'), but it's worth returning to, not least because your question raises interesting issues relating to word class and syntactic function. The notion of word class (also called part of speech) is a convenient one for labelling purposes but tends to buckle under pressure.
