has seen a recent and dramatic increase in the distribution and abundance of wild hogs. The increase in wild hog numbers has led to an increase in the damage these animals cause to natural, agricultural, and developed landscapes. Recent data suggest a large and growing population of wild hogs (approximately 150,000 individuals).

South Carolina's Growing Wild Hog Problem: Recommendations

growth, giant hogweed is an of displacing native plants. It dies back during the winter months, leaving bare ground open to erosion on riverbanks and steep slopes. The sap of giant hogweed makes human skin sensitive to ultraviolet light, resulting in severe burns and blisters. Contact with the eyes can cause permanent blindness.
