

hardware and software verification pdf

Software verification is a discipline of software engineering whose goal is to assure that software fully satisfies all the expected requirements.

Software verification - Wikipedia

In computer engineering, a hardware description language (HDL) is a specialized computer language used to describe the structure and behavior of electronic circuits, and most commonly, digital logic circuits.. A hardware description language enables a precise, formal description of an electronic circuit that allows for the automated analysis and simulation of an electronic circuit.

Hardware description language - Wikipedia

Whether you are a hardware designer or a software designer, read the Nios Â® II Hardware Development Tutorial to start learning about designing embedded systems on an Intel FPGA. The "Nios Â® II System Development Flow" section is particularly useful in helping you to decide how to approach system design using Intel 's embedded hardware and software development tools.
