This book is the outcome of a decade's research into a specific architecture and associated learning mechanism for an artificial neural network: the architecture involves negative feedback and the learning mechanism is simple Hebbian learning.

Hebbian Learning and Negative Feedback Networks - Springer

The central idea of Hebbian Learning and Negative Feedback Networks is that artificial neural networks using opposed ideas of activation can use straightforward Hebbian learning to self-organise so that they uncover fascinating buildings in data models.

Other negative feedback artificial neural networks are discussed in Appendix A; one of these is the original network of Plumbley [153] which provided the first insight into the strength of the combination of Hebbian learning and negative feedback networks. 3.1.1 Equivalence to Oja's Subspace Algorithm Many contemporary artificial neural ...

Here we propose [2] a multiplicative Hebbian learning rule which is, at the same time, self-limiting and selective for negative excess kurtosis (for the case of symmetric input distributions).

Hebbian learning is never going to get a Perceptron to learn a set of training data. There exist variations of Hebbian learning, such as Contrastive Hebbian Learning , that do provide powerful supervised learning for biologically plausible networks.

Hebbian theory is a neuroscientific theory claiming that an increase in synaptic efficacy arises from a presynaptic cell's repeated and persistent stimulation of a postsynaptic cell. It is an attempt to explain synaptic plasticity, the adaptation of brain neurons during the learning process.
