Meet the challenges of our digitized world. Efficient high-performance computing (HPC) is a key to success in any business. But it can be daunting to design, deploy, and manage.

High-Performance Computing Solutions – Reliable, Available

GPU computing is the most accessible and energy-efficient path forward for high performance computing (HPC) and the data center. In fact, five of the six Gordon Bell Prize finalists use supercomputers powered by NVIDIA GPUs.. Today, NVIDIA powers the fastest supercomputers in the U.S. and Europe, as well as some of the most advanced systems under construction.

4 What Does High Performance Computing Include? – High-performance computing is fast computing – Computations in parallel over lots of compute elements (CPU, GPU) – Very fast network to connect between the compute elements

Introduction to High-Performance Computing

The International Journal of High Performance Computing Applications provides a lively forum for the communications of original research papers and timely review articles on the use of supercomputers to solve complex modeling problems in a spectrum of disciplines.. The emphasis will be on experiences with the use of supercomputers rather than on the exposition of computational results peculiar ...

A supercomputer is a computer with a high level of performance compared to a general-purpose computer. Performance of a supercomputer is measured in floating-point operations per second instead of million instructions per second (MIPS). As of 2017, there are supercomputers which can perform up to nearly a hundred quadrillion FLOPS. As of November 2017, all of the world's fastest 500 ...

HPCC (High-Performance Computing Cluster), also known as DAS (Data Analytics Supercomputer), is an open source, data-intensive computing system platform developed by LexisNexis Risk Solutions. The HPCC platform incorporates a software architecture implemented on commodity computing clusters to provide high-performance, data-parallel processing for applications utilizing big data.
