Healthcare-associated infections | HAI | CDC

Healthcare-Associated Infections Data by hospital on nationally reported metrics Report Highlights – The percentage of hospitals reporting zero infections for the five HAIs measured has declined dramatically since 2015. This trend puts patients at higher risk for numerous complications and longer recoveries and is cause for concern.

Healthcare-Associated Infections

Nosocomial Infections Infection acquired in the hospital: > 48 hours after admission \$5 billion annually: increased hospital length of stay, antibiotics, morbidity and mortality related to severity of underlying disease, immunosuppression, invasive medical interventions frequently caused by antibiotic-resistant organisms: MRSA, VRE, resistant Gram-

Nosocomial Infections - The George Washington University

Healthcare associated infections (HAI) are acquired by patients during the course of receiving treatment for other conditions within a healthcare setting. HAIs are one of the top 10 causes of death in the United States. Both surveillance and prevention activities are vital in reducing the number of patients affected by HAIs.

Healthcare Associated Infections (HAI) - TN.gov

Hospital-acquired infections (HAIs) are infections that patients can get as a result of receiving treatment in a hospital. New York State (NYS) monitors HAI rates to ensure patient safety and provide the public with data to compare hospital infection rates. This report describes the HAIs that occurred in NYS hospitals in 2016.

Hospital Acquired Infections in New York State, 2016

2 million hospital-acquired infections in the US annually 99,000 deaths annually (at least half preventable) \$6 billion in excess annual costs (each adds > \$15,000 to a patient's hospital bill)

Prevention of Hospital Acquired Infections

Hospital Acquired Infections Hand Hygiene is the single most effective intervention to reduce the cross transmission of nosocomial infections Hand washing must have some characteristics. Use alcohol based hand sanitizers Sterilization and disinfection measures should be carried out What is MRSA?
