

hydrocarbon degrading bacteria from pdf

One of the most important characteristics of hydrocarbon degrading bacteria is the ability of emulsifying hydrocarbons in solution by producing surface active agents such as biosurfactants (Hommel, 1990; Neu, 1996; Desai and Banat, 1997; Bredholt et al., 1998).

Isolation and identification of petroleum hydrocarbon

natural remediation in Qatar, an Arabian Gulf Country, is a suitable model to study hydrocarbons-degrading bacteria and how they deal with high variable composition and structure of hydrocarbons, especially under the extreme environmental conditions, and dry soils in Qatar [10].

Isolation, Screening and Activity of Hydrocarbon-Degrading

Isolation and molecular identification of hydrocarbon degrading bacteria from oil-contaminated soil Fatiha Dilmi ... screen and identified the hydrocarbon degrading bacteria from oil polluted soil. Three oil ... reduce hydrocarbon pollution are expensive (Erdogan et al., 2012).

Isolation and molecular identification of hydrocarbon

petroleum and other hydrocarbon pollutants can be removed from the environment [22] and is cheaper than other remediation technologies and the most efficient for environment safe depollution [23]. Among the microorganisms able to grow on hydrocarbons, bacteria remain qualitatively and quantitatively the most active agents [3] [24]-[29].

Isolation and characterization of hydrocarbon-degrading

Similarly, in preliminary study 57 oil degrading bacteria were isolated from oil impregnated soil in search of potent hydrocarbon degrader 14. These isolates were purified from soil samples on the basis of their colony morphology, texture, growth, temperature and hydrocarbon utilization ability.

Isolation of hydrocarbon degrading bacteria from soils

The bacterial isolates were capable of degrading a variety of different hydrocarbons with its ability to grow in different metals stress environment. Such bacteria can be successfully used for the ...

(PDF) Characterization of Hydrocarbon Degrading Bacteria

Hydrocarbon Degrading Bacteria from Pakistani Soil: Isolation, Identification, Screening and Genetical Studies Article (PDF Available) in Pakistan Journal of Biological Sciences 7(9) · September ...

(PDF) Hydrocarbon Degrading Bacteria from Pakistani Soil

Many environments are characterized by low or elevated temperatures, acidic or alkaline pH, high salt concentrations, or high pressure. Extremophilic microorganisms are adapted to grow and thrive under these adverse conditions. Hydrocarbon degrading extremophiles are thus ideal candidates for the biological treatment of polluted extreme habitats.

Biodegradation and bioremediation of hydrocarbons in

Hydrocarbons are degraded primarily by bacteria and fungi. Adaptation by prior exposure of microbial communities to hydrocarbons increases hydrocarbon degradation rates. Adaptation is brought about by selective enrichment of hydrocarbon-utilizing microorganisms and amplification of the pool of hydrocarbon-catabolizing genes.
