

### **infection control in the pdf**

of infection. A breach in infection control practices facilitates transmission of infection from patients to health care workers, other patients and attendants. It is therefore important for all health care workers, patients, their family members, friends and close contacts to adhere to the infection control guidelines strictly.

### **Infection Control Prevention in Basic Care**

Effective infection prevention and control (IPC) is the cornerstone for the delivery of safe, effective, high-quality health care. WHO's IPC Global Unit developed recommendations identifying the core components of effective IPC programmes, to help countries and health care facilities develop action plans to prevent current and future threats.

## **WHO | Infection prevention and control**

Infections and infectious diseases are a great burden on many societies, including the countries in the WHO European region. To reduce that burden an integrated approach is required, combining health promotion, disease prevention and patient treatment. The prerequisite for success in this fight is the participation of all health care professionals.

Infection Control. Infection control is an essential component of any health care delivery. Infection control measures can be as simple as hand washing and as sophisticated as high-level disinfection of surgical instruments. Implementing these measures can prevent transmission of disease in health care settings and the community.
