Integrated Modeling Of Chemical Mechanical Planarization

Bond graph, Process engineering, Chemical reactors, State space representation. ABSTRACT In this work, the bond graph approach is employed to develop an integrated chemical reactor model, able to be exploited for supervision and diagnosis of industrial process. The obtained model is evolutive and generic comparing with the first principle methods.

Integrated Modeling Program, Applied Chemical Theory (IMPACT)

In this work an integrated tribo-chemical model of material removal at the asperity/abrasive scale was developed. Abrasive and pad properties, process parameters, and slurry chemistry are all considered.
