Temporal and functional sensitivity analysis in integrating models To conduct a simulation we have to set parameter values for the model Eqs. (1) , (2) described in the previous section. in setting the parameters we have adopted the parameter values used in the Simile® documentation, 1 and have chosen:

Introduction. The functional integration within and between neuronal networks is crucial for normal information processing and behaviors, but it may also ground the pathophysiological basis of long-range neuronal functional disturbances and functional networking reorganization associated with focal brain disorders .. Mesial temporal lobe epilepsy (MTLE) is an epileptic syndrome characterized ...
