for distinguishing the various subtypes of intelligent tutoring systems, so this chapter will use "ITS" to refer only to tutoring systems where a student receives either immediate or delayed feedback and hints on multiple steps that comprise a solution to a problem.

INTELLIGENT TUTORING SYSTEMS FOR CONTINUOUS, EMBEDDED

processing with the goal of building better intelligent tutoring systems. What is an Intelligent Tutoring System? One reason that ITS is such a large and varied field is that "intelligent tutoring system" is a broad term, encompassing any computer program that contains some intelligence and can be used in learning.

Can Intelligent Tutoring Systems Teach? In spite of the lack of visibility of ITS systems in the real world outside the rarified air of university research labs, there is a modest amount of research suggesting that intelligent tutoring systems can achieve remarkable increases in student learning over traditional classroom instruction.

Intelligent Tutoring Systems: What Happened? - eLearning

Intelligent tutoring systems are not, in general, commercially feasible for real-world applications. A criticism of Intelligent Tutoring Systems currently in use, is the pedagogy of immediate feedback and hint sequences that are built in to make the system "intelligent".
