USING COPULAS An introduction for practitioners

Introduction & Summary Computer system users, administrators, and designers usually have a goal of highest performance at lowest cost. Modeling and simulation of system design trade off is good preparation for design and engineering decisions in real world jobs.

This lecture completes the introduction of classes by showing a way to implement user-defined iterators. It then discusses simulation models, and illustrates some of the ideas underlying simulations modeling by simulating a random walk.

Pump gas molecules to a box and see what happens as you change the volume, add or remove heat, change gravity, and more. Measure the temperature and pressure, and discover how the properties of the gas vary in relation to each other.

A Vision for Teaching with Simulation A Living Document from the National League for Nursing NLN Board of Governors, April 20, 2015 Mission: Promote excellence in nursing education to build a strong and diverse nursing workforce to advance the health of our nation and the global community.

A Vision for Teaching with Simulation

Simulation has been increasingly adopted as a teaching methodology in nursing education and staff development learning environments, and is rapidly gaining common ground as a standard teaching strategy.
