1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

Early history Electric model cars. The invention of the first model electric vehicle is attributed to various people. In 1828, Ányos Jedlik, a Hungarian who invented an early type of electric motor, created a small model car powered by his new motor. In 1834, Vermont blacksmith Thomas Davenport built a similar contraption which operated on a short, circular, electrified track.

The United States has made great progress since 1970 in cleaning the air, but the job is far from complete. November 15, 1990 marks a milestone in Clean Air Act history, the signing of the 1990 Amendments. These amendments set the stage for protecting the ozone layer, reducing acid rain and toxic pollutants, and improving air quality and visibility.
