Let $(A, p)_N$ be a Frechet algebra. In this paper, we introduce the concept of Segal Frechet algebra and investigate known results about abstract Segal algebras, for Segal Frechet algebras.

Thus, all Segal algebras have the same ideal theory as L^1 , but, as far as is known, all are different from L^1 in the matter of factorization. As to the question of multipliers it is known that the multipliers of the Segal algebras $L^1(\Gamma)$ are different from those of $L^1(\mathbb{T})$.
