

landslides types mechanisms and pdf

Landslide types and mechanisms are dealt with in the first part, which gives a classification of landslides, an overview of landslide hazards and risk in the context of natural processes (the contributions by Korup, and by Clague & Roberts), as well as an overview of landslides triggered by

Landslides - types, mechanisms and modelling, edited by John J

Landslides: Types, Mechanisms and Modeling is a multiauthored work of 32 chapters including overviews of aspects of landslide theory (22 chapters) and selected case studies (10 chapters).

(PDF) Landslide Ecology and Landslides: Types, Mechanisms

Research aimed at better understanding slope stability and failure has accelerated in recent years, accompanied by basic field research and numerical modeling of slope failure processes, mechanisms of debris movement, and landslide causes and triggers.

L. Montrasio and R. Valentino: A model for triggering mechanisms of shallow landslides 1151 The model presented is based on the hypotheses derived from

A model for triggering mechanisms of shallow landslides

Landslides have geological causes but can be triggered by natural processes (rainfall, snowmelt, erosion and earthquakes) or by human actions such as agriculture and construction. Research aimed at better understanding slope stability and failure has accelerated in recent years, accompanied by basic field research and numerical modeling of slope failure processes, mechanisms of debris movement, and landslide causes and triggers.
