You start by learning how to craft composable UIs using React, ranging from rendering with JSX and creating reusable components to routing and creating isomorphic applications that run on Node.js. We then move on to show you how to take the concepts of React and apply them to building Native UIs using React Native.

This is because unlike the hybrid frameworks of the past, React Native does not use the web view. It uses the multi-threaded native components and APIs that ship with your device. In this course, I will introduce you to the React Native framework. We still start off by generating new React apps with the React Native CLI.
