Dynamics of Magnetic Reconnection in High-Energy-Density

Magnetic reconnection is generally discussed via a fluid description. Here, we evaluate the reconnection rate assuming a fractal topology of the reconnection region.

(PDF) Magnetic Reconnection Rate in Space Plasmas: A

PDF | Magnetic reconnection is a topological rearrangement of magnetic field that converts magnetic energy to plasma energy.

(PDF) Magnetic Reconnection in Astrophysical and

Magnetic reconnection is the fundamental mechanism by which magnetic energy is dissipated in the universe. Observationally, energy is released in bursts rather than in a continuous manner, driving phenomena such as solar flares and magnetospheric substorms.

Magnetic Reconnection - University of Delaware Dept. of

Prior models of magnetic reconnection in weakly ionized plasmas have generally assumed symmetric in \vec{v} , \vec{u} . In general, however, there will be some asymmetry in the upstream magnetic field strengths, temperatures, and densities. The standard model for anemone jets predicts that chromospheric reconnection occurs when newly emerged flux interacts ...

ASYMMETRIC MAGNETIC RECONNECTION IN WEAKLY IONIZED

Introduction | In ideal magnetohydrodynamics (MHD), the magnetic field is "frozen-in" to the plasma | If two parcels of plasma are connected by a field line at one time, they will be connected by a field line at all future times | Real plasmas allow some magnetic field slippage | Magnetic reconnection occurs when magnetic field lines are broken and rejoined in a highly conducting plasma

Magnetic Reconnection in Laboratory, Astrophysical, and

Magnetic reconnection is a physical process occurring in highly conducting plasmas in which the magnetic topology is rearranged and magnetic energy is converted to kinetic energy, thermal energy, and particle acceleration.

Magnetic reconnection - Wikipedia

Magnetic Reconnection $\hat{=}$ A change in magnetic topology in the presence of a plasma Plasma carrying a current Magnetic fields \vec{j} Consider a small perturbation

Magnetic Reconnection in Plasmas: a Celestial Phenomenon

Magnetic reconnection is a ubiquitous plasma process Zweibel, E. & Yamada, Annu. Rev. Astron. Astrophys. (2009). Reconnection Geometry B-field Plasma flow $\hat{\epsilon}$ Magnetic reconnection converts magnetic field energy into plasma flows, plasma heating, and energetic particles $\hat{\epsilon}$ Reconnection is important for magnetized plasmas from

Nonthermal electron energization from magnetic

A widely accepted scenario of magnetic reconnection in collisionless space plasmas is the breakage of magnetic field lines in X-points. In laboratory, reconnection is commonly studied in pinches, current channels embedded into twisted magnetic fields. No model of magnetic reconnection in space plasmas considers both null-points and pinches as peers.
