Making Sense of Performance in Data Analytics Frameworks

Data/Frame model posits a highly interactive relationship between data inputs and mental representations or “frames” for interpreting data. The Data/Frame model also proposes six key sensemaking activities for handling frames in light of (anomalous) data: Elaborating, Questioning, Comparing, Preserving, Re-framing, and Seeking.

FOCUS: A Model of Sensemaking

From summarizing and interpreting data, to identifying non-trivial facts, patterns, and relationships in the data, to making predictions from the data, Making Sense of Data addresses the many issues that need to be considered as well as the steps that need to be taken to master data analysis and mining.

Making Sense of Data | Wiley Online Books

The objective is to capture those aspects of the data that are of interest. Intuitive summaries such as totals, averages, and proportions need little explanation. Other summaries that are less commonly used may require some explanation, and even some justification, before they make sense.

The Four Questions of Data Analysis - SPC Press
