Description : This book addresses the mathematics of Kalman-Bucy filtering and is designed for readers who are well versed in the practice of Kalman-Bucy filters but are interested in the mathematics on which they are based. The main topic in this book is the continuous-time Kalman-Bucy filter.

The material is meant to be a theoretical complement to courses dealing with applications and is designed for students who are well versed in the techniques of Kalman-Bucy filtering but who are also interested in the mathematics on which these may be based. The main topic addressed in this book is continuous-time Kalman-Bucy filtering.

In contrast the Kalman-Bucy filter can be used when  $Y(\hat{\bullet}^{\text{TM}})$  and  $fl(\hat{\bullet})$  are nonstationary and when measurements  $Z(\hat{\bullet})$  are available commencing at some time  $t_0 > \hat{\bullet}$  cc permitted. 2) The Kalman filter may only be used when the signal process  $y(o)$  is the output of a linear finite-dimensional system driven by white noise. In contrast ...

### **Optimization and Kalman-Bucy Smoothing**

We propose an approach to address this problem when working with the continuous-time Kalman-Bucy filter. We show how our approach may be reformulated as an optimal control problem, and proceed to analyse the corresponding value function in some detail.
