Critical thinking is the objective analysis of facts to form a judgment. The subject is complex, and several different definitions exist, which generally include the rational, skeptical, unbiased analysis, or evaluation of factual evidence. Critical thinking is self-directed, self-disciplined, self-monitored, and self-corrective thinking. It presupposed assent to rigorous standards of ...

The study of the functional neuroanatomical bases that drive meditation's apparently salutary effects remains in its infancy, however. This is all the more true of research examining putative differences in the anatomical structure of the brains of meditation practitioners. Although many studies have examined meditation with functional methods such as electroencephalography (EEG), event ...
