Molecular biology / m ɔːlɪkjʊləˈbɪɒlədʒi / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

Molecular diagnostics uses in vitro biological assays such as PCR-ELISA or Fluorescence in situ hybridization. The assay detects a molecule, often in low concentrations, that is a marker of disease or risk in a sample taken from a patient. Preservation of the sample before analysis is critical.

Department of Biological Sciences Mission. As leaders in the education of a highly trained and diverse scientific workforce, our mission is to provide a dynamic educational experience by engaging students in hands-on, inquiry-based learning activities at the bench and in the field. Through these experiences our students will gain a conceptual and experiential understanding of the biological ...

Molecular Plant is a Cell Press partnership journal (Press Release). Established in 2008 and sponsored by the Institute of Plant Physiology and Ecology, Shanghai Institutes for Biological Sciences, Chinese Academy of Sciences, and the Chinese Society of Plant Biology, Molecular Plant is dedicated to serving the plant science community by publishing novel and exciting findings with high ...

Honors Honors Program in the School of Biological Sciences. The Honors Program in the School of Biological Sciences provides an opportunity for outstanding majors in the School to pursue advanced work in independent research via participation in the Excellence in Biological Sciences Research Program and earn Honors in Biological Sciences upon graduation.

Overview of JBC's publication process. For initial submission, authors should prepare their manuscript as a single PDF file. At this stage, the primary goal is for the manuscript to contain the necessary information to enable a full scientific assessment, so while all sections of the manuscript need to be present, references need to be complete, and figures and tables need to be clearly ...

Increasing numbers of individuals, particularly the elderly, suffer from neurodegenerative disorders. These diseases are normally characterized by progressive loss of neuron cells and compromised motor or cognitive function. Previous studies have proposed that the overproduction of reactive oxygen species (ROS) may have complex roles in promoting the disease development.

Nanomedicine, Vol. I: Basic Capabilities (Landes Bioscience, 1999). The first volume of the Nanomedicine book series describes the set of basic capabilities of molecular machine systems that may be required by many, if not most, medical nanorobotic devices, including the physical, chemical, thermodynamic, mechanical, and biological limits of such devices.
