1. Introduction1.1. The concept of 'oxidative stress' The term 'oxidative stress' began to be used frequently in the 1970s, but its conceptual origins can be traced back to the 1950s to researchers pondering the toxic effects of ionizing radiation, free radicals, and the similar toxic effects of molecular oxygen (Gerschman et al., 1954), and the potential contribution of such processes ...

Oxidative stress in health and disease: The therapeutic

Preamble. The American College of Cardiology (ACC) and the American Heart Association (AHA) are committed to the prevention and management of cardiovascular diseases through professional education and research for clinicians, providers, and patients.

2014 ACC/AHA Guideline on Perioperative Cardiovascular

Molecular Diagnostics -- Genetic & genomic testing

Chitosan is a biocompatible, antibacterial and environmentally friendly polyelectrolyte with a variety of applications including water treatment, chromatography, additives for cosmetics, textile treatment for

antimicrobial activity, novel fibers for textiles, photographic papers, biodegradable films, biomedical devices, and microcapsule implants for controlled release in drug delivery.

Chitosan high molecular weight | Sigma-Aldrich

Integrative Molecular Medicine is a peer-reviewed, online open access journal dedicated to a new research discipline at the interface between clinical research and basic biology.

Integrative Molecular Medicine - OA Text

However, less is known about the origin of these changes and whether they are a primary cause of aging or are secondary to aging itself. In addition, whether these changes are a consequence of mitochondrial damage or constitute an adaptive mechanism to mitigate age-dependent impairments remains controversial.

Mitochondrial Dynamics: Coupling Mitochondrial Fitness

The circulatory system, also called the cardiovascular system or the vascular system, is an organ system that permits blood to circulate and transport nutrients (such as amino acids and electrolytes), oxygen, carbon dioxide, hormones, and blood cells to and from the cells in the body to provide nourishment and help in fighting diseases, stabilize temperature and pH, and maintain homeostasis.

Circulatory system - Wikipedia

Methods On the basis of publicly available FDA reviews, the authors assessed enrollment of women in trials supporting 36 drug approvals from 2005 to 2015. Prevalence-corrected estimates for the participation of women were calculated as the percentage of women among trial participants divided by the percentage of women in the disease population (participation to prevalence ratio [PPR]), with a ...

Participation of Women in Clinical Trials Supporting FDA

In Brief The pathophysiology of the link between diabetes and cardiovascular disease (CVD) is complex and multifactorial. Understanding these profound mechanisms of disease can help clinicians identify and treat CVD in patients with diabetes, as well as help patients prevent these potentially devastating complications. This article reviews the biological basis of the link between diabetes and ...

Footnotes for Framingham point scoring ** Note: Framingham risk scoring for men and women is presented in the Appendix below.. Aetna considers hs-CRP testing experimental and investigational for all other indications, including use as a screening test for the general population and for monitoring response to therapy, because its clinical value for these uses has not been established.

Cardiovascular Disease Risk Tests - Medical Clinical

Abstract. Cardiovascular complications are mainly responsible for the high morbidity and mortality in people with diabetes. The awareness of physicians for the importance of primary prevention increased lately and numerous strategies have been developed.

Cardiovascular Complications in Diabetes | Diabetes Care

In biology, poisons are substances that cause disturbances in organisms, usually by chemical reaction or other activity on the molecular scale, when an organism absorbs a sufficient quantity.. The fields of medicine (particularly veterinary) and zoology often distinguish a poison from a toxin, and from a venom. Toxins are poisons produced by organisms in nature, and venoms are toxins injected ...
