### **Motor Control and Motor Learning | Motor Control | Learning**

The processes that underlie motor learning should guide therapy. Three major factors that affect motor learning are environmental conditions, cognitive processes, and movement organization. Examination of the clinical implications of these factors, however, results in contradictory predictions regarding optimal practice conditions for motor skills.

## **Motor Learning and Occupational Therapy: The Organization**

Motor learning is measured by analyzing performance in three distinct ways: acquisition, retention and transfer of skills. 23 Acquisition is the initial practice or performance of a new skill (or new control aspect of a previously learned motor skill).
