Introduction to Multi-Agent Systems Yoav Shoham (Written with Trond Grenager) April 30, 2002

Introduction to Multi-Agent Systems

Multi-Agent System, Distributed Planning, Fuzzy Logic, JADE 1. INTRODUCTION While Multi-Agent System (MAS) is a concept mainly used in research [23], by adapting it we must face various problems, some of which are serious enough to place the utility of MAS in the doubt. Since we wish to use the MAS in large scales, concurrent systems, and since ...

Multi-agent event recognition in structured scenarios Vlad I. Morariu and Larry S. Davis Institute for Advanced Computer Studies University of Maryland, College Park, MD 20742

Multi-agent event recognition in structured scenarios

A multi-agent system (MAS or "self-organized system") is a computerized system composed of multiple interacting intelligent agents. Multi-agent systems can solve problems that are difficult or impossible for an individual agent or a monolithic system to solve.

Multi-agent system - Wikipedia

System (MAS) paradigms: multi-agent decision systems and multi-agent simulation systems. In multi-agent decision systems, agents participating in the system must make joint decisions as a group.

INTRODUCTION TO MULTI-AGENT SIMULATION - arXiv

Consensus and Cooperation in Networked Multi-Agent Systems 3 1.1 Consensus in Networks The interaction

topology of a network of agents is represented using a directed graph $G = (V,E)$ with the

Distributed Dynamics and Optimization in Multi-agent

In computer science multi-agent planning involves coordinating the resources and activities of multiple "agents".. NASA says, "multiagent planning is concerned with planning by (and for) multiple agents. It can involve agents planning for a common goal, an agent coordinating the plans (plan merging) or planning of others, or agents refining their own plans while negotiating over tasks or ...
