Journal of Biomedical Nanotechnology (JBN) is a peer-reviewed multidisciplinary journal providing broad coverage in all research areas focused on the applications of nanotechnology in medicine, drug delivery systems, infectious disease, biomedical sciences, biotechnology, and all other related fields of life sciences.

Journal of Biomedical Nanotechnology

With applications in fields such as biomedicine, renewable energy, and synthetic materials, the research in this book will provide experimentalists, professionals, students, and academics with an in-depth understanding of nanoscience and its impact on modern technology.

Nanomedicine is the medical application of nanotechnology. Nanomedicine ranges from the medical applications of nanomaterials and biological devices , to nanoelectronic biosensors, and even possible future applications of molecular nanotechnology such as biological machines .

Nanomedicine - Wikipedia

Biomedical Nanotechnology. The science of nanotechnology involves the development of new materials with dimensions on the order of tens to a few hundreds of nanometers. Bigger than what we normally consider molecules and smaller than bulk materials, nanomaterials have emergent properties that are a direct result of their size.
