Download PDF Download ePub Once the haunt of Jack the Ripper, London's East End is a vibrant mix of history and the avant-garde, where elegant Georgian town houses exist side by side with colorful street markets and the hippest clubs.

Necessary as Blood (Duncan Kincaid & Gemma James #13)

A lumbar puncture (LP), also called a spinal tap, is an invasive outpatient procedure used to remove a sample of cerebrospinal fluid (CSF) from the subarachnoid space in the spine. (This test is similar to a blood test, in which a needle is inserted into an artery to collect blood for testing.) Your brain and spinal cord are surrounded and (CSF).

1. Review orders and clarify as necessary. 2. Gather all the necessary supplies prior to performing any type of specimen collection. Position supplies on same side as free hand and within easy reach to avoid reaching across patient's arm to access supplies. a. Do not set blood collection tray on patient's bed or tray.

ADVENTIST LAB PARTNERS - STANDARD OPERATING PROCEDURE

NOTE: With otherwise normal CBC results contamination of CSF by peripheral blood will add approximately 1 WBC for every 600 RBCs, and approximately 1 mg/dl of protein for every 1200 RBCs.

CEREBROSPINAL FLUID LABORATORY

Spinal cord imaging is not considered necessary prior to LP, but, if performed, images should be reviewed to confirm the position of the conus prior to LP. An alternate approach to obtaining cerebrospinal fluid (CSF) with a paramedian needle insertion through the L5-S1 space (Taylor approach) (figure 1) has been successfully used in a patient with advanced ankylosing spondylitis [8].
