Medical Devices Overview The medical device manufacturing industry produces equipment designed to diagnose and treat patients within global healthcare systems. Medical devices range from simple tongue depressors and bandages, to complex programmable pacemakers and sophisticated imaging systems.

Five Trends to Watch in the Medical Device Industry in 2018

as primary eyecare providers, medical optometrists are well positioned to identify patients at risk and to diagnose, monitor, and treat glaucoma. However, given that the expanded scope of practice incorporating glaucoma treatment is relatively new, many optometrists lack confidence in their ability to treat this potentially blinding disease.

New Trends in Medical Treatment of Glaucoma

Internet-connected medical devices are holding the health system togetherâ€”playing critical roles in such tasks as patient care, medical records and billingâ€”but each connected device is a potential door for cybercriminals.
