Newton's Laws State Newton's laws of motion and gravitation. Resolution of Forces Given the force acting on a system, draw a force diagram and/or resolve forces into their components and/or solve for an unknown force. Newton's Second Law Problems Given any two of the three variables in Newton's second law, solve for the third.

As lovers of inquiry based problem solving, we decided to set up a free form exploration of Newton's Laws of Motion using some really fun physics activities. From our previous balloon races we learned about Newton's Third Law of Motions which states: For every action, there is an opposite and equal reaction.

Newton's third law states, "For every action, there is an equal and opposite reaction." When we push a ball, it rolls, but the ball also pushes a little bit against your hand. However, while the amount of force in both directions is equal, you have a lot more mass than the ball does, so the ball moves more than your hand does.
