noncommutative curves of genus pdf

The Journal of Algebra is a leading international journal and publishes papers that demonstrate high quality research results in algebra and related computational aspects. Only the very best and most interesting papers are to be considered for publication in the journal. With this in mind, it is important that the contribution offer a substantial result that will have a lasting effect upon the ...

Kristin Lauter is a Principal Researcher and Research Manager for the Cryptography group at Microsoft Research. Her research areas are number theory and algebraic geometry, with applications to cryptography. She is particularly known for her work on homomorphic encryption, elliptic curve cryptography, and for introducing supersingular isogeny graphs as a hard problem into cryptography.

Shallit , MIT Press, August 1996 ; Automorphic Forms and Representations, D. Bump, CUP 1996 ; Notes on Fermat's Last Theorem, A.J. van der Poorten, Canadian Mathematical Society Series of Monographs and Advanced ...

Number Theory Books, 1996

This paper studies the notion of W-measurable sensitivity in the context of semigroup actions. W-measurable sensitivity is a measurable generalization of sensitive dependence on initial conditions.

In mathematics, the Riemann hypothesis is a conjecture that the Riemann zeta function has its zeros only at the negative even integers and complex numbers with real part $1 / 2$.It was proposed by Bernhard Riemann (), after whom it is named.The name is also used for some closely related analogues, such as the Riemann hypothesis for curves over finite fields.

In mathematics, a differentiable manifold (also differential manifold) is a type of manifold that is locally similar enough to a linear space to allow one to do calculus.Any manifold can be described by a collection of charts, also known as an atlas.One may then apply ideas from calculus while working within the individual charts, since each chart lies within a linear space to which the usual ...
