

nucleotide analogues as antiviral pdf

At the sides of nucleic acid structure, phosphate molecules successively connect the two sugar-rings of two adjacent nucleotide monomers, thereby creating a long chain biomolecule. These chain-joins of phosphates with sugars (ribose or deoxyribose) create the "backbone" strands for a single- or double helix biomolecule. In the double helix of DNA, the two strands are oriented chemically in ...

Nucleobase - Wikipedia

Antiviral drugs are a class of medication used specifically for treating viral infections rather than bacterial ones. Most antivirals are used for specific viral infections, while a broad-spectrum antiviral is effective against a wide range of viruses. Unlike most antibiotics, antiviral drugs do not destroy their target pathogen; instead they inhibit their development.

Journal of Human Virology & Retrovirology Hepatitis B Virus (HBV) and S-Escape Mutants: From the Beginning until Now Volume 2 Issue 3 - 2015 Priscila Perazzo 1, Nair Eguibar , Rodrigo H González 2, Alejandro D Nusblat , and María L Cuestas1* 1Institute of Microbiology and Medical Parasitology,

Hepatitis B Virus (HBV) and S-Escape Mutants: From the

A CHB "cure" can be defined at different levels. Basically, the most desirable end point is the elimination of both the viraemia (HBV-DNA) and the viral surface antigen (HBsAg), followed by seroconversion to anti-HBsAg (anti-HBs) antibodies. This condition is largely satisfactory because it is associated with a substantial improvement of outcomes and a reduced risk of developing ...

PubMed comprises more than 28 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full-text content from PubMed Central and publisher web sites.

Home - PubMed - NCBI

Currently available therapies for chronic hepatitis B virus (HBV) infection can efficiently reduce viremia but induce hepatitis B surface antigen (HBsAg) loss in very few patients; also, these therapies do not greatly affect the viral covalently closed circular DNA (cccDNA).
