This metric is a measure of the number of classes that will be affected by changes to a given parent class.[12][13]

Analysis of Software Complexity Using Object Oriented

Assignment of Scale to Object-Oriented Software Measures -2 Validation of a software metric requires that the metric be shown to be a proper numerical characterization of the claimed dimension [1][9].

The Assignment of Scale to Object-Oriented Software Measures

The object-oriented paradigm shows some peculiarities when compared with traditional software development. This is particularly apparent when one considers that object-oriented system development supports prototyping, and uses its own object-oriented programming languages and tools.
