11 Optimum Design of a Hybrid Renewable Energy System Fatemeh Jahanbani and Gholam H. Riahy
Electrical Engineering Department, Amirkabir University of Technology Iran 1. Introduction In Iran, 100% of the region populated with more than 20 families is electrified. For the other regions the electrification will be done.

Optimum Design of a Hybrid Renewable Energy System

The optimum design of hybrid renewable energy systems is a hot topic and there is a rich literature dedicated to this topic. The mentioned design problem to be formulated is related to the determination of the optimal configuration of the power system and optimal location, type and sizing of generation units installed in certain nodes, so that the system meets load requirements at minimum cost [21] .

Optimum design of hybrid renewable energy systems

Optimum Design of Renewable Energy Systems: Microgrid and Nature Grid Methods investigates the development of highly efficient energy storage equipment and of operation optimization technology of compound energy systems. This book is an essential reference source for technical consultants, urban environment engineers, and energy researchers interested in the development of efficient energy systems and operation optimization technology.
