Preface What follows are my lecture notes for a first course in differential equations, taught at the Hong Kong University of Science and Technology.

Introduction to Differential Equations

In this chapter we will study ordinary differential equations of the standard form below, known as the second order linear equations : $y''' + p(t)y'' + q(t)y = g(t)$.

5 Second Order Linear Equations 57 ... FIRST ORDER ORDINARY DIFFERENTIAL EQUATIONS Theorem 2.4 If F and G are functions that are continuously differentiable throughout a simply connected region, then $F dx + G dy$ is exact if and only if $\frac{\partial G}{\partial x} = \frac{\partial F}{\partial y}$. Proof. Proof is given in MATB42.

Differential Equations I - A» Department of Mathematics

Elementary Differential Equations with Boundary Value Problems is written for students in science, engineering, and business. Chapter 6 deals with applications. However, the exercise sets of the sections ... focuses the student's attention on the idea of seeking a solution of a differential equation by writing it
